This software release is maintained by www.phytec.de.

Compatible Release	AM335x PD16.2.x

In the attached BSP Manual software images may be referenced generically. For example in Chapter 5.1.1 (page 15) the instructions provided are to copy linuximage and oftree. The images downloaded from the PHYTEC FTP may not match this naming convention. In this case linuximage will be the corresponding zImage-<machine name>.bin file and oftree will be the corresponding zImage-<machine name>.dtb file.
